

“Overall we are delighted with our new portable staging.

Already, it has been put to good use with various events held in the school Hall. With the diversity of the staging and the many ways you easily can construct different levels, this staging product is ideal for our many Music Concerts held in the school.

Your company has certainly designed a very good product, easily erected and very portable, and very light in construction and robustly made.

Your sales staff have been very courteous and provided all information required for the staging, and our order was delivered on time, as was the extra staging ordered, also on time.

As said an extremely good product fit for purpose in a school environment.”
